Every call answered. *Every follow-up kept.*

A receptionist that answers your clinic's phone and messages day and night, books the visit, reminds the patient, brings back the review visits you advised and grows your Google reviews.

WHAT WE DO FOR YOU

A receptionist 24/7

Answers calls and WhatsApp, day and night, and books the visit.

Appointment reminders

Fewer no-shows, and a new time for anyone who missed.

Follow-ups you advised

The review visit you asked for, reminded and booked.

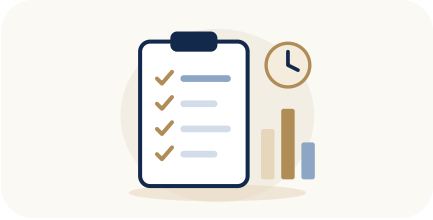

More Google reviews

Every patient asked the same way, within Google's rules.

Post-visit check

A kind message the day after a procedure. Concerns reach you.

A sheet every morning

Patients seen, no-shows, follow-ups due, calls caught.

Need a website? We build that too.

A fast, clear site for your clinic: doctors, timings, location and a booking button, set up and looked after for you.

HOW IT WORKS

01

Tell us how your clinic runs

Timings, fees, doctors, and what the front desk may say.

02

We set it up

The receptionist, the messages and your morning sheet.

03

You try it first

Call it yourself and read every message before patients do.

04

It goes live

On your own number. Fewer missed calls, fewer no-shows.
